Plumbing - Electrical - Carpentry
Sheet Metal Worker
HVAC Mechanic - Boilermaker
Welding - Insulation Worker
Painting - Glazing

Preparing Tomorrow’s Future Today
**What Is Apprenticeship?**

Apprenticeship is a structured system of training designed to prepare individuals for occupations in skilled trades and crafts.

Apprenticeship combines related classroom instruction with on-the-job training under the supervision of experienced workers. An apprentice who successfully completes the prescribed number of hours of training in a registered apprenticeship program is awarded a certificate of completion.

Apprentices are selected on the basis of qualification without regard to race, color, age, religion, sex, or national origin.

**What Is Needed To Qualify For Apprenticeship?**

Qualifications vary according to the requirements of the occupation. However, all apprenticeship programs require applicants to be at least 16 years old and physically able to perform the job.

All companies prefer and most require a high school diploma or equivalent certificate.

Some training beyond high school may enhance opportunities in apprenticeship programs and allow apprentices to progress through a program more quickly and easily.

**What Does Apprenticeship Offer?**

Now -- today, workers learn while they earn. Tomorrow, workers who complete apprenticeship programs can expect to hold good jobs at good pay!

Their skills are a source of personal satisfaction as well as employment security.

Statistics show that apprentices earn higher wages, have more stable work records, and are promoted sooner and more often than workers who have not been trained through apprenticeship programs.

There are more than 800 apprenticeable occupations.

A small sample of these jobs are pipe fitter, welder, electrician, plumber, cook, electronics technician, fire fighter, operating engineer, fish and game warden, heating and air conditioning service person, and operating engineer.

Apprenticeship opportunities are constantly expanding into new fields such as allied health services, energy, and textile occupations.

All the occupations are listed on the United States Department of Labor/Office of Apprenticeship website at http://www.doleta/oa.gov
